

# There is no such thing as an unlimited resource.

Paper accounts for approximately 26% of global landfill waste each year.

A typical American office worker goes through almost 10,000 sheets of paper. Every Year.

420,000,000 tons annually with demand likely doubling between 2005 and 2030.

E-books feature immediate delivery, links, searching, sound, animation, and more. They won't stress your spine and are usually easier on the wallet.

Beautifulharmony Multimedia promotes e-books. If we do print products, those will be high reuse items such as core rules or setting books. For other items such as modules, you'll probably want to print a few pages for in-game reference and handouts, so we do our best to organize content to minimize the number of reference prints.
